Leading Innovators in Light-Sport Aircraft Design 2021

Having developed a modular and highly effective flight machine that is fast becoming the goto solution for military operations, border patrol, and private hire, SkyRunner LLC has made itself a mainstay of modern flight solutions. Adventurous, flexible, and adaptive, the SkyRunner MK 3.2 was born out of the spirit of exploration, and has fast become a new and brilliant way to approach saving lives in the most difficult terrains thanks to its manoeuvrability and top-of-the-range technological elements.

THE GLAM PRESTIGE
GROUP

Most Inspirational Hearing- Impaired Company Founder (Paris): Louisa Maria Boubakri

A collection of several different luxury brands, The Glam Prestige Group has made a name for itself by accumulating a variety of businesses into one conglomerate. With the founder, Louisa Maria Boubakri, being one of the most exemplary leaders in her field of the moment, her influence has been guiding each of the individual brands under the name of The Glam Prestige Group to further success as a whole, taking it to the Cannes Film Festival and to conference rooms all over the world.

Introducing the Global Business Awards 2021

The Global Business Awards returns to CV Magazine for its fourth year in 2021, and once again aims to recognise and reward the hardworking individuals and firms from across the world's business landscape.

Looking to recognise companies and individuals across all industries and regions, our awards endeavour to be an accurate representation of the best in business. To move successfully from nominee to victor, there must be evidence of extensive expertise within any given sector, whilst also demonstrating commitment to customer and client service. Business size or geographical presence are not considered in our awards, and we only look to recognise excellence, innovation and determination to succeed.

Through our merit-driven process, we look to ensure that any successful candidates in our awards can be assured that their accolades are truly deserved whilst also offering the opportunity to expand the achievement further to CV Magazine's highly engaged circulation and regular web traffic.

42. AFEL Group:
Civil Construction Firm of the Year - Mauritius
43. Schoolbooks 4 Africa:
Best Educational Supply Company - Zimbabwe

Best Antibody Producer 2021 - Europe

SICGEN Antibodies is a custom antibody creating business that has ingrained itself into rural farm life. In essence, by making itself a part of an existing ecosystem and naturalistically producing antibodies in goat herds, it is able to achieve a great number of antibodies per animal that increases accessibility and decreases cost for its clients. With the demand for antibody based medical solutions on the rise due to the Covid-19 outbreak, this is more pivotal than ever, and we checked in with the company behind it all to get a glimpse behind the curtain at its outstanding operation.

A European company that manufactures polyclonal antibodies for cell biology research, SICGEN Antibodies began in 2009. Fundamentally, whilst it started as a spin-off from the University of Coimbra's department by Dr José Ramalho and two other co-founders, it quickly became part of the NEOTEC Portuguese Initiative. In addition to this, in 2009, Dr José himself moved to NOVA University of Lisbon where he continues to ply his trade in cell biology and the development of new antibodies to this day, owning 50% of the SICGEN Antibodies portfolio by 2017 after a UK investor acquired the other 50% in February of that year.

Based in Coimbra, in a small village in the region where the production unit has developed an exemplary and large lab space to allow them to work, its complex also includes an animal house that allows them to keep track of the hundreds of antibodies produced in the herds of goats it has on site. An example of an exemplary modern biotechnological operation, SICGEN Antibodies has seamlessly integrated itself into a rural ecosystem that still produces goat cheese by traditional methods, an important source of income for many families in the vicinity that it helps to upkeep by supporting the farmers.

Fundamentally, whilst it started as a spin-off from the University of Coimbra's department by Dr José Ramalho and two other co-founders, it quickly became part of the NEOTEC Portuguese Initiative.

SICGEN Antibodies, therefore, has become an outstanding producer of polyclonal antibodies operating in an empathic and naturalistic manner that provides the highest quality products and services at the highest quality under the most competitive standards, prices, and standardized controls. As a result, its work has been used in a number of life science research areas, such as fluorescent proteins like GFP, mCherry, tdTomato and more, being featured in a multitude of peer reviewed publications as it becomes a cornerstone producer of custom antibodies for national and international institutes of learning, research, and pharmaceuticals.

Being one of the few antibody production companies in Europe, it has made a name for itself by creating affordable, accessible antibodies with its rigorously maintained and highly competitive operation, due to the type of animal it has chosen to work with. As it works with goats, it has a far higher rate of antibody production per animal, working in tandem with the local people in order to create a mutually beneficial ecosystem for the farmers and researchers alike, specializing in particular in raising antibodies against recombinant proteins and prizing itself on its immense flexibility.

Recently, it has pivoted to creating antibodies that can target SARS-Cov-2 in order to help researchers find methods to fight the pandemic.

Having been financed by Portugal 2020 and I&D Covid-19, it was able to achieve this in relatively little time, allowing it to move quickly towards the encroaching future of its industry; in essence, it sees this future being heralded in by moving away from animal farms and towards in vitro technologies. By keeping its fingers on the pulse of these developments, it promises its clients that it will be keeping up, working hard to herald in this new, more versatile and ethically sound future as its size and adaptability continue to wow its market segment. With the urgent need for antibody products still in full swing, SICGEN Antibodies will be continuing to step up to the plate to help, working in collaboration with academics and clients to remain an international reference point for exemplary custom antibody creation.
